Morning and Evening Stars.

Venus will be Morning Star until October 4th, then Evening Star the rest of the year.
 Mars will be Morning Star until January 12th, then Evening Star the rest of the year.
 Jupiter will be Evening Star until February 8th, then Morning Star until August 26th, then Evening Star the rest of the year.

Saturn will be Morning Star until May 11th, then Evening Star until November 15th, then Morning Star the rest of the year.

TRUE TIME.—Two kinds of time are used in Almanacs; *clock* or *mean-time* in some, and *apparent* or *sun-time* in others. *Clock-time* is always right, while *sun-time* varies every day. People generally suppose it is twelve o'clock when the sun is due south, or at a properly made noon-mark. But this is a mistake. The sun is seldom on the meridian at twelve o'clock; indeed this is the case only on four days of the year, namely: April 15, June 15, September 1, and December 24. In this Almanac, as in most others, the time used is *clock* or *mean-time*.

SUGGESTIONS FOR VISITORS TO YO-SEMITE.—It is very natural to suppose that parties visiting the Valley wish not only to see the wonderful sights there, but enjoy themselves. To do this effectually please observe the following: Do not start before the 20th of April, nor later than the 25th of October. Let your company consist of persons with similar tastes and dispositions. Leave care and complainers behind. Ladies should adopt—for this occasion—the Bloomer costume, and not take many “changes;” a good linen riding dress, and strong boots, are desirable. Gentlemen should take one change of clothing and two of under-clothing, but the amount should be regulated by the length of their intended stay. Saddle-bags are best for packing in. Do not start unless you can spend at least a week in the Valley—a whole summer would be better. One word more: Do not expect hotel accommodations equal to those of the Cosmopolitan, or Lick House, or Occidental, but go straight to “Hutchings,” and he will do his best to make your stay comfortable, and your visit a pleasure trip.

Routes, Distances, etc., to Yo-Semite Valley.

The principal starting point to the Yo-Semite Valley is Stockton. From here there are four main routes: *via* Big Oak Flat, Coulterville, Bear Valley, and Mariposa. That by Big Oak Flat is the shortest and affords a view of the Golden Rock Water Co.'s flume, 264 feet high and 2,200 feet long. That *via* Coulterville can be traveled the earliest in the season, and has the beautifully unique "Bower Cave" on the way. That by Bear Valley and Mariposa affords the opportunity of visiting the Mariposa Grove of Big Trees, and gives the best general view of the Valley. There is yet another route, indirectly—that *via* Copperopolis to the Calaveras Big Tree Grove. Going *via* Big Oak Flat, you change stages at Chinese Camp; *via* Coulterville, change at Crimea House. See Map of Routes, etc.

From Stockton, *via* Big Oak Flat.

The Yo-Semite Valley is about 150 miles south of east from San Francisco. It is about 7 miles long by from $\frac{1}{2}$ mile to 1 mile in width. There is about 50 feet fall from one end of the Valley to the other. It is about 4,060 feet above the sea. The main Merced river—70 feet wide—runs through it. Its general course is northeasterly and southwesterly. In many places the granite walls of the valley are nearly vertical, and will average about 3,500 feet in height. Numerous kinds of deciduous and evergreen trees and shrubs are abundant. Ferns, flowers, and grasses grow in almost endless variety. The water of the river is very clear and pure. Trout are in reasonable abundance—although in the art of "taking" them the Indians seem to excel.

From the head of the valley to the foot of the Vernal Fall—about two miles—the ascent is about 2,000 feet. To the top of the Vernal Fall, 350 feet. From top of Vernal Fall to foot of the Nevada Fall—about one-half mile—the ascent is 250 feet. To top of Nevada Fall, 700 feet. The "Cap of Liberty" (formerly called Bellows Butte, Gwin Peak, Mt. Broderick, Mt. Francis, etc., etc.) is about 2,000 feet above the foot, and at the north side of the Nevada Fall.

President.

A. W. JILLSON,

Vice-President.

Annual Cash Income, over One Million Dollars.

The times we live in and are passing through demand strong, substantial, and experienced Underwriters, of the conservative and high-toned school—Companies of brains as well as capital, and a thorough knowledge of and an intimate acquaintance with the business as well as assets—Companies that are uniform in their rules, *just in their rates, economical in their management*, and prompt in the payment of losses. Such an institution is the PHOENIX OF HARTFORD, whose past fair fame attests the legitimacy of its claims to preference and favor.

THE PHOENIX enjoys by far the largest patronage in the State of California of any of the Eastern Insurance Companies, and pays the largest annual tax to the State.

THE PHOENIX has been represented on the Pacific Coast for nearly *Ten Years*, during which period *two hundred and ninety-seven losses* have been adjusted and paid, amounting to nearly *two hundred and fifty thousand dollars*, payments being made on an average of *six days* after fires occurred.

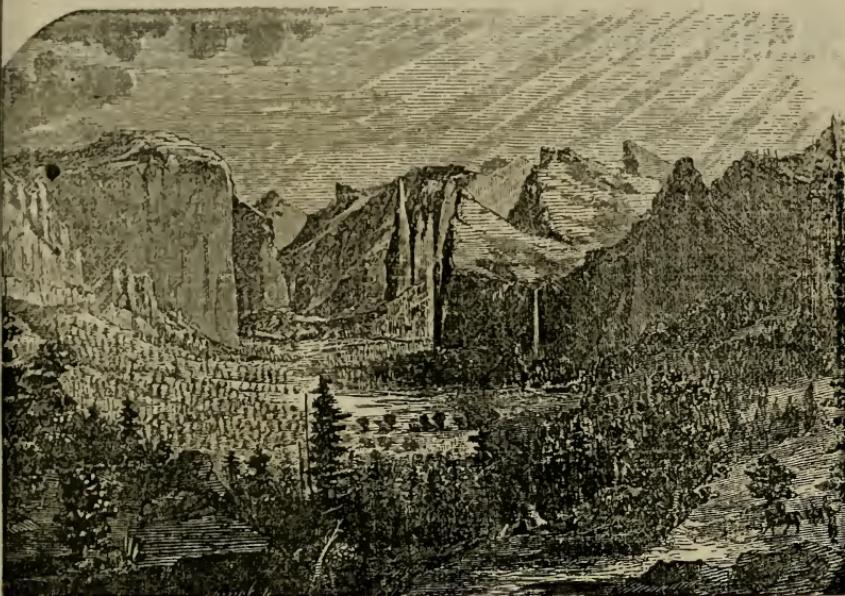

THE PHOENIX is the only Company represented on this Coast through full-commissioned agents located at each prominent place, and who are authorized to bind the Company by the immediate issue of policies.

Losses are promptly adjusted, and paid in United States Gold Coin, at points where they occur, without any unnecessary expense, delay, or trouble to the claimant.

Agents appointed, losses adjusted and paid, correspondence promptly attended to insurance supplies furnished agents, and the business of the Company in the Pacific States under the supervision and control of

BRANCH OFFICE, SAN FRANCISCO.

F L O R E N C E .

GREAT SIMPLICITY!

GREAT CAPACITY!

NO SNARLING OR BREAKING
OF THREADS!

THE MOST RELIABLE AND POPULAR

SEWING MACHINE!

In the World.

CALIFORNIA STATE FAIR, 1865—REPORT OF THE COMMITTEE.

FLORENCE SEWING MACHINE.—After a careful examination of this *New and Beautiful Machine*, viewing it as we do in its mechanical points, we consider that it is worthy of much praise, particularly that portion of its arrangement by which the *reversible* motion is obtained, which is simplicity itself, and in our opinion worthy of special consideration. Also, the *complete and positive control over the tension*, as exhibited in this Machine, along with the arrangement for taking up the slack of the thread, as was shown in sewing without any alteration, and without any stoppage of Machine, *from the finest lace to four thicknesses of leather*.

Your Committee, therefore, after a close and careful investigation, consider it *the best and most improved machine now in use*, and award it the *first and highest premium*.

(Signed)

 THOMAS HANSBROW,
 GEORGE SCHMEISER,
 SAMUEL BLAIR.

CALIFORNIA STATE FAIR, 1866—REPORT OF THE COMMITTEE.

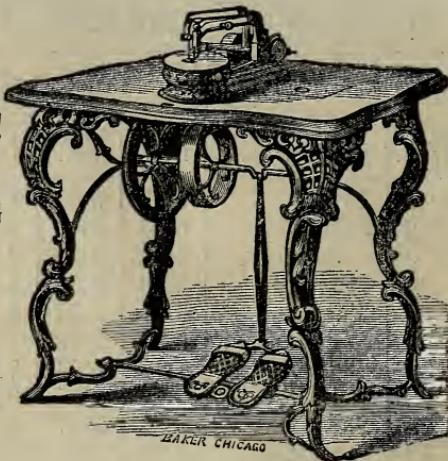

To the President of the State Agricultural Society: Your Committee on Sewing Machines beg leave to report that we have examined the several Sewing Machines on exhibition, and find that, *for general family use, the Florence is the best*.

(Signed)

 J. N. ANDREWS,
 THOS. C. McHALE,
 L. ELKUS.

Office, 111 Montgomery Street, San Francisco.

SAMUEL HILL, - - - - - Agent.

MOUNT HOOD.

[From Butman's *Celebrated Picture*.]

Every traveler by sea to Oregon can see the lofty top of this perpetually snow-clad peak, flashing its frozen sheen over the densely timbered ridges of the Coast Range, for nearly two hundred miles. It is, besides, one of the great landmarks inland. The view above was taken from the banks of the Columbia River, some thirty miles distant, and is one of Butman's happiest efforts.

On its northern side it is nearly vertical for seven thousand feet; there the snows of winter accumulate until they reach the very summit; but, when the summer thaw commences, all this vast body of snow becomes disintegrated at once, and, in a sweeping avalanche, carrying all before it, buries itself in the deep furrows at its base, and leaves the precipice bare.

In August last, Professor Wood (the eminent botanist), and others, made the difficult and dangerous ascent. From his description we give the following: "The long summer heat had undermined the snows, and the slides had opened chasms of invisible depths across our path. We looked down into several of these chasms and saw that the massive walls below consisted of solid, blue ice, and terminated at length in the blackness of darkness. We could hear the noise of running water, apparently in torrents. One of these chasms was unavoidable, and must be crossed. Its transverse length was nearly a mile, and its width from ten to one hundred feet. By the aid of a rope and poles we crossed (of course at the narrowest place), and afterward, by rope and poles, tugging, panting, dizzy, we dragged ourselves up to the terrific crest of this mountain monarch. The summit area is very limited dimensions—a crescent in shape, half a mile in length, and from three to fifty feet in width. A canon of enormous depth plunged down along the southeast flank, and is filled in part by a glacier, evidently in motion, and having below a very abrupt termination. Terminal and lateral *moraines* mark its course, and a torrent of water issues from beneath. While we delayed here, an avalanche of rocks, an immense mass, started by the wind, thundered down the left wall of this canon several thousand feet, and its track was marked by a trail of white smoke. On the west side of the ancient crater, at the base of a vast craggy pinnacle of rocks (a portion of the ancient rim of the crater), is still an open abyss, whence issue constantly volumes of a strong sulphurous smoke."

Finding the barometers useless in taking heights at so great an altitude, Professor Wood had to rely on his thermometers, with the following result: At the summit of the Cascade Range, and foot of Mount Hood proper, 4,400 feet; at the limit of forest trees, about 9,000 feet; at the highest limit of vegetation, 11,000 feet; at the summit of the mountain, 17,600 feet.

WHY are lawyers like scissors? Because they never cut each other, but only what is placed between them.

GARDEN SEEDS FOR 1867.

NEW YORK SEED WAREHOUSE,

C. L. KELLOGG,

427 Sansome Street, near Clay,

SAN FRANCISCO, CALIFORNIA,

IMPORTER AND DEALER IN

GARDEN, FIELD, FRUIT, FLOWER AND TREE SEEDS.

DUTCH BULBOUS ROOTS,

Imported Direct from the first Flower Nurseries of Europe.

Seeds will be packed in the best manner, to go any distance, and forwarded as desired. Light kinds of Seed can be forwarded through the mail, postage paid. All orders, by mail or otherwise (with remittances), will be attended to with care and dispatch.

The greatest care will be taken to have all Seeds sold by me pure, reliable, and the very best and choicest of their kind.

A LIBERAL DISCOUNT MADE TO THE TRADE.

The Agents of Wells, Fargo & Co.'s Express, and Postmasters generally, are requested to act as agents for receiving orders for Seeds.

Boxes of Seeds, containing 100 papers, or more, put up for the country trade, in such assortments as desired.

LICK HOUSE,

CORNER OF MONTGOMERY AND SUTTER STREETS,

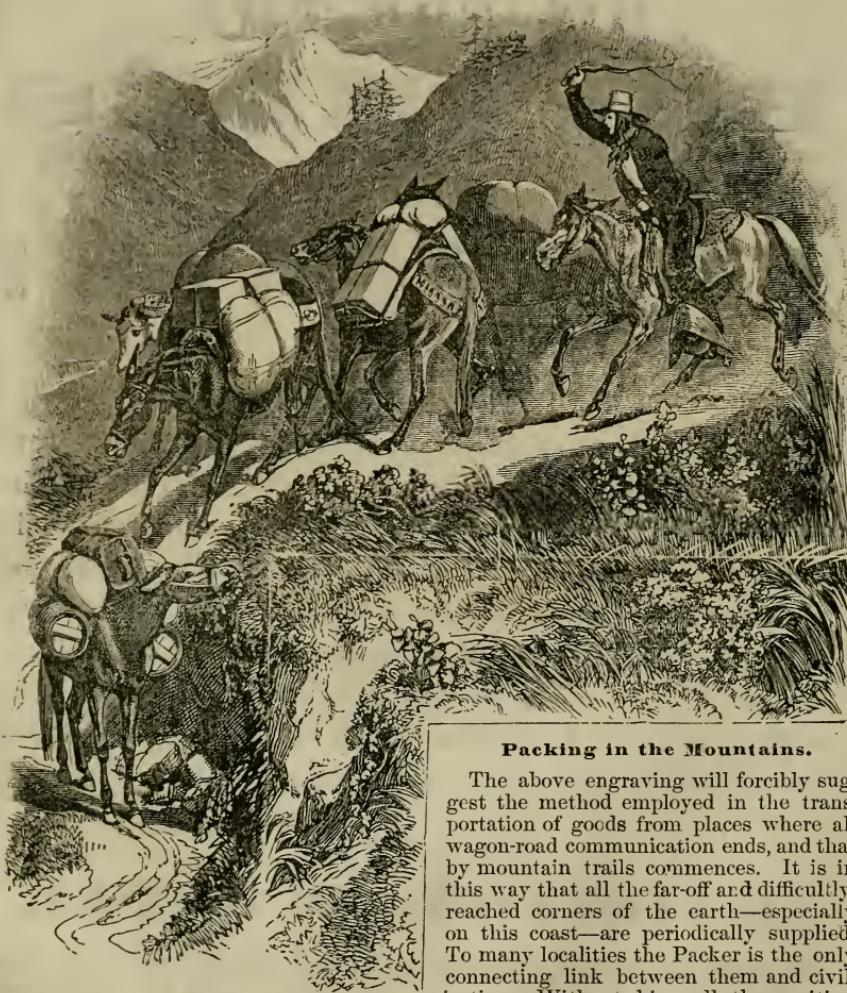

SAN FRANCISCO, CAL.

JOHNSON & CO. - - - PROPRIETORS.

This elegant and spacious Hotel is situated on the principal promenade street of San Francisco.

The LICK HOUSE is furnished with a splendor and elegance that is unsurpassed by any Hotel on the Pacific Coast, combining all the modern improvements and arrangements belonging to a FIRST-CLASS HOTEL.

The Proprietors assure their patrons that the LICK HOUSE shall not be excelled in any of its appointments, or in polite and prompt attention to all the comforts of its guests.

Packing in the Mountains.

The above engraving will forcibly suggest the method employed in the transportation of goods from places where all wagon-road communication ends, and that by mountain trails commences. It is in this way that all the far-off and difficultly-reached corners of the earth—especially on this coast—are periodically supplied. To many localities the Packer is the only connecting link between them and civilization. Without him, all the exciting

news from the outside world (including the latest fashions!) though "an o'er true tale," would become as an old almanac—entirely out of date. Wagon-roads, however, are rapidly superseding pack-trains. May we not expect as much for our wonderful Yo-Semite, before many years have elapsed?

**HO, FOR THE
BIG TREES
— O F —
CALAVERAS !**

There is no spot of earth more delightful or more wonderful than the MAMMOTH TREE GROVE OF CALAVERAS. The deep shadows of giant trees, from twenty to thirty feet in diameter; the beautiful shrubbery, the cool walks and drives, and the delicious water, make it a charming summer resort.

It can be easily reached by stage or carriage from Stockton, *via* Copperopolis, Angels', and Murphy's Camp. Persons visiting the Yo-Semite Valley can do so *via* the Mammoth Trees of Calaveras. (See Map and Table of Distances.)

A FIRST-CLASS HOTEL

Is open from early Spring until late in the Fall, for the accommodation of our guests. No pains will be spared to make it pleasant for visitors.

SPERRY & PERRY, Proprietors.

LIFE AND ACCIDENT INSURANCE.

THE ORIGINAL
TRAVELERS INSURANCE COMPANY,
 OF HARTFORD, CONN.,
 INSURES AGAINST
A C C I D E N T S
 OF EVERY DESCRIPTION
 Causing Bodily Injury or Loss of Life.

CASH ASSETS, OVER \$700,000 00.

The Travelers Insurance Company was the first to successfully introduce in this country the practise of Insurance Against Accidents of whatever kind, whether they occur in traveling, or in hunting, fishing, sailing, riding, skating, in the street, store, office, or while working in shops, mills, factories, or on the farm.

The Company has been in successful operation since April 1st, 1864, and up to August 1st, 1866, had issued over *sixty-five thousand* policies, and paid over *three thousand* losses—in addition to the large sum of \$164,500 realized to fifty-one policy holders for less than \$1,000 received in premiums.

GENERAL ACCIDENT POLICIES.

The best policy for every man, whether he travels much or little, is a General Accident Policy, which insures against every possible form of casualty, at all times and places.

An Annual Premium of \$25 will secure a General Accident Policy for \$5,000 in case of fatal accident, or \$25 per week during disability caused by accident.

Any other sum from \$500 to \$10,000, with compensation per week varying from \$2 50 to \$50, at proportionate rates.

A liberal discount on three and five year policies.

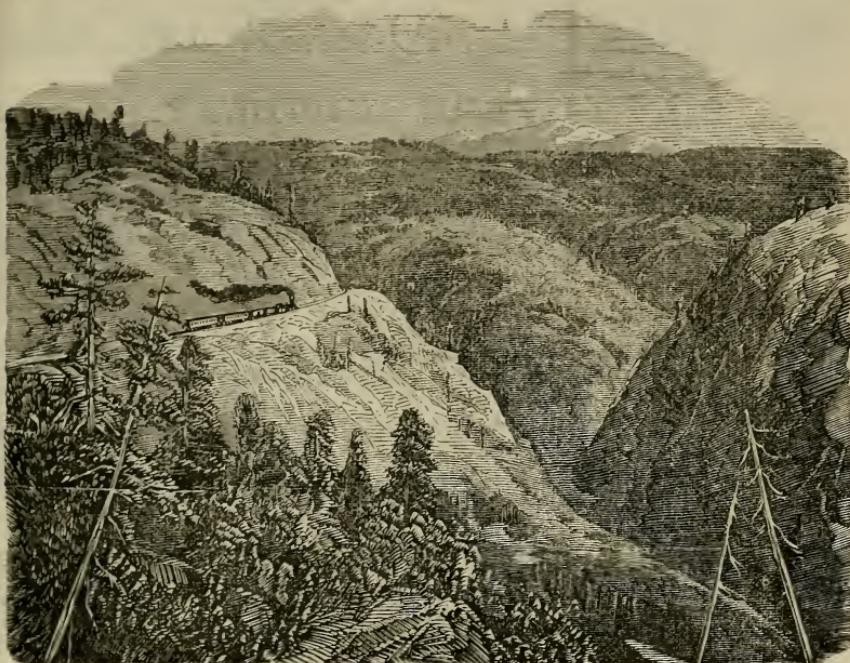

Twenty-five cents will secure a ticket for 24 hours, covering \$5,000, with \$25 weekly compensation in event of accident.

Tickets from one to thirty days at proportionate rates.

Agents in all prominent places who are authorized to issue policies and tickets.

BRANCH OFFICE, SAN FRANCISCO,

R. H. MAGILL, - - - - - Manager.

Scene Near "CAPE HORN"—On the Central Pacific Railroad.
From a Painting by N. Bush.

THE CENTRAL PACIFIC RAILROAD.—This dream of the past is fast becoming a reality of the present. The earnest aspirations of friends from the Orient to the Occident are crystallizing into facts. That semi-prophetic shaking of the head, in days gone by, whose language seemed to say "No, not in our day—not in our day," is becoming obsolete and a fiction. Already, the iron horse has swept out from his metal-tracked stable in Sacramento, and defiantly driving his steaming breath through his fiery nostrils, has dashed across the prairie, rushed among the foot-hills, and is rapidly climbing to the very summit of the Sierra Nevadas themselves. Ten thousand men with sinewy limbs are busy, delving into the rocky ribs of the mountains, and with pick and shovel, drill and blasting powder, by excavations, bridges, tunnels, fillings, culverts, *ad infinitum*, are making a highway for that great missionary of progressive civilization—the Locomotive. By indomitable will, by unfaltering determination, by almost superhuman energy and skill, and apparently boundless resources, no doubt has hindered, or obstacle permanently retarded the steady advancement of this grand enterprise. Yawning gulfs have been spanned, nearly perpendicular precipices walled up, mountain spurs tunneled, and deep cuts made. Over one hundred tons of steel drills have been used already, and as much more will be needed. From two to three hundred kegs of blasting powder are consumed daily. A small army of mechanics, teamsters, cooks, purveyors, and laborers in almost every conceivable position are seen upon the line of the road, and make it a phase of active life never before witnessed on this coast. The view presented above is about three miles from Colfax, and about sixty-five miles from Sacramento. Wild depths, weird heights, lofty rocks, and scenes of wonderful grandeur are on every hand, making the ride, even for its own sake, a complete pleasure trip.

WATCHES, DIAMONDS,

President.....	THOMAS MOONEY.
Secretary.....	SAMUEL CRIM
Actuary.....	JOHN FOWLER

**Placer Mining Two Hundred Years Ago.**

The quaint illustration above is copied from a work published in England in 1833, now in the possession of Mr. Atwood, of Grass Valley, Cal., and is a translation of a book descriptive of "Placer Mining in Hungary," written in the Teutonic language, and published in Germany some years before—or nearly two hundred years ago. To Californians it will be especially suggestive and interesting.

THE ALTA CALIFORNIA NEWSPAPER.

The ALTA CALIFORNIA newspaper was established and the first number issued on the 4th of January, 1849. Although nominally then a new paper, it was really only a continuation under a new name of the STAR AND CALIFORNIAN, which had been previously issued from the same office. The STAR was established on the 7th of January, 1847, in the village of Yerba Buena, and the CALIFORNIAN was started at Monterey on the 15th of August, 1846, but moved to San Francisco in May, 1847. The STAR and CALIFORNIAN were published as rival weekly papers until the gold fever rose in the summer of 1848, and then both suspended publication. In September, the CALIFORNIAN started again, and on the 18th of November the two papers were consolidated as the STAR AND CALIFORNIAN, which changed into the ALTA CALIFORNIA. The paper was established with its present name before the State was admitted, and even before the Constitution was framed. The ALTA is thoroughly a pioneer, and it is the only journal on the Coast that can claim that honor. Although the name was twice changed, it is the same paper established on the 7th of January, 1847—nearly twenty years ago—before the discovery of gold, before California was recognized as finally American, before even the majority of those who were to be Pioneers expected to see the Pacific Coast or its basin. It has witnessed the growth of our city, and there is, we believe, only one house within two miles of the City Hall older than the ALTA, and not two dozen families have been established here so long as this paper. The ALTA prospered with the growth of the city, and soon became the leading representative of public opinion. On the 22d of January, 1850, it was changed to a daily, and was the first daily on the Coast. On the 4th of July of the same year it was printed on the first steam press used in California. Ever since it became a daily paper it has been recognized as one of the leading newspapers of the Union. In the amount of its reading matter, in the fullness and accuracy of its local news, in the variety of its foreign and domestic correspondence, in the abundance of its telegraphic despatches, in the careful editorial exposition of important news, and in the zealous advocacy of all movements of charity, patriotism, or the development of the resources of the city, State, or Nation, the ALTA has been distinguished. Since the 2d of December, 1856, the paper has been owned by its present proprietors, Messrs. Frederick MacCrellish and Wm. A. Woodward. In October last the office of the ALTA was moved to No. 529 California street, to a building owned by the proprietors of the paper, and used exclusively as a printing house. This building is twenty-five feet front by ninety-five feet in depth, and four stories in height, including the basement, or press-room. All the ceilings are high, ranging from twelve to fifteen feet, giving both light and ventilation. The basement, or press-room, is paved with hard bricks, laid in cement, and the massive frame foundations of the presses are built in with the same material, bolted together with iron bars an inch thick. The ground floor is occupied as a Publication Office and Editorial Rooms; the entire second floor is required for the use of the ALTA Job Printing Office, and the third floor as the Composing-Room of the ALTA newspaper.

California street, on which the new building is situated, is fast becoming the Wall street of San Francisco. Many of the monetary institutions of the coast are already located in the block between Montgomery and Sansome streets, and others are preparing to move there. Among those at present doing business on California street, are the banking house of Wells, Fargo & Co., Pacific Bank, (both on corners of Montgomery street,) the Bank of British Columbia, Bank of British North America, Luning & Co., bankers, British and California Banking Company, and the following insurance companies; Pacific, Union, California Home, Occidental, Merchants' Mutual, Imperial Fire and Life of London, North British and Mercantile; California Lloyds, Δ etna (Eastern), British and Foreign Marine, Continental (N. Y.), New York Life (N. Y.), North American, Northern Assurance Fire and Life, Pacific Mutual, Imperial Fire and Life. In addition, the Bank of California is putting up a magnificent cut-stone building at the corner of Sansome and California streets, and on the opposite corner the Firemen's Fund Insurance Company are erecting a large and spacious building. The California Building and Loan Society, and San Francisco Savings Union are also on this street. The new Merchants' Exchange, which promises to be a massive and splendid structure, is now building just below Montgomery street.

WINTER EVENING IN THE MINES.

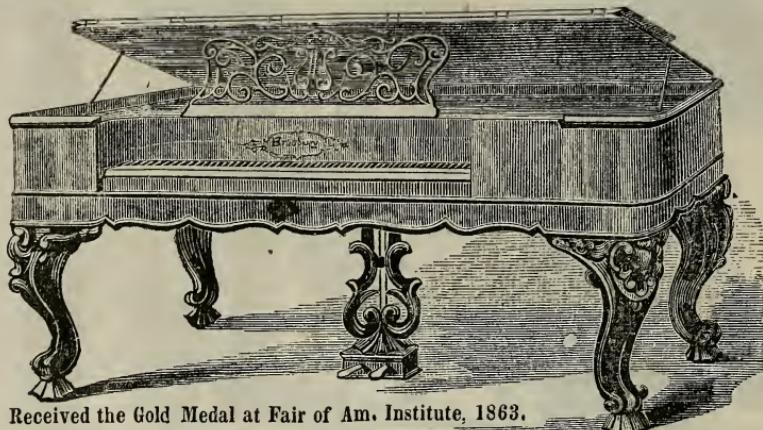

Miner's Song.

The Eastern sky is blushing red,
The distant hill-top glowing,
The water o'er its rocky bed
In idle frolics flowing;
'Tis time the pick-axe and the spade
Against the rocks were ringing,
And with ourselves the golden stream
A song of labor singing.
The mountain air is fresh and cold,
Unclouded skies bend o'er us;
Broad placers, rich in hidden gold,
Lie temptingly before us.
We need no Midas' magic wand,
Nor wizard's rod divining—
The pick-axe, spade, and brawny hand
Are sorcerers in mining.
When labor closes with the day,
To simple fare returning,
We gather in a merry group—
Around the camp-fires burning.
The mountain sod our couch at night,
The stars keep watch above us;
We think of home, and fall asleep
To dream of those who love us.

S. * * * *

A SUGGESTION TO MINERS.—Gold, we all know, comes mainly from quartz. Decayed quartz is generally the richest and most easily worked. Hard quartz ledges generally stand boldly up and are readily seen, but are seldom worth working. Now our theory is this: The decayed quartz ledges are *not* easily seen, but *they are there, nevertheless*, and wherever there have been rich placer mines, in gulches or canons, and but little gravel, the gold has come from some decomposed quartz ledge not far off, but *which is level with the earth*. Now, if some systematic ditching is done *across the regular strata of rock*, we have no fear but many new and rich ledges will be discovered. In such case please put our name down for one claim, for the suggestion.

Physicians and others, at a distance, ordering Goods from us, can depend upon having their orders filled with the same regard to QUALITY and PRICE as though obtained in person, and we feel confident of giving satisfaction in every case.

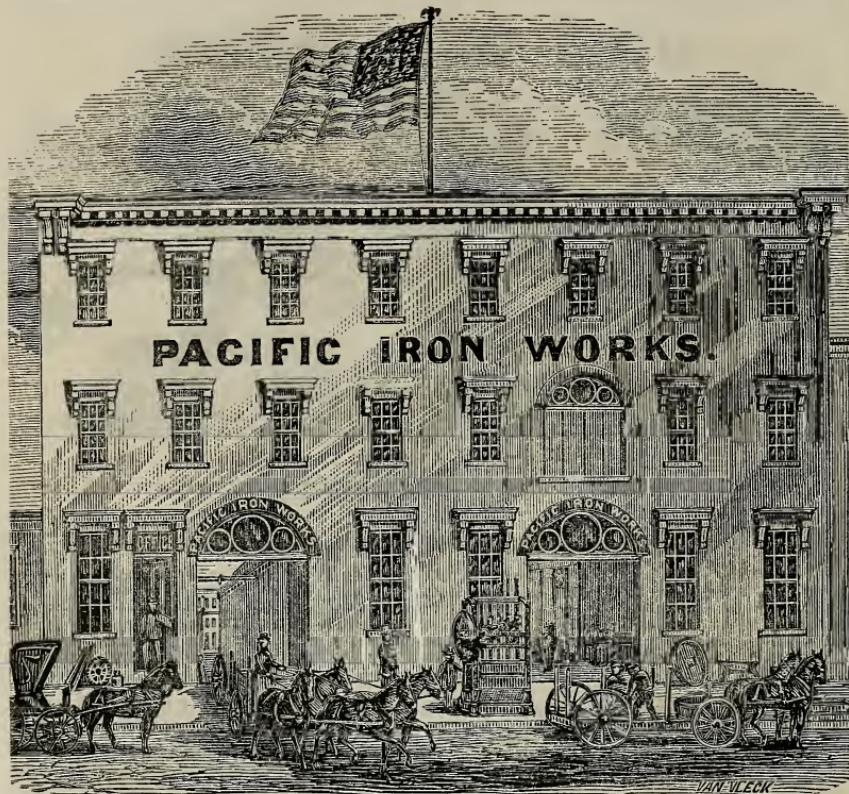

Native Californian Amusement—“Catching the Rooster.”

This was one of the most popular and exciting of pastimes among native Californians. The body of a rooster was buried in the earth, and nothing but the head visible. The contestant, mounted, stood ready for the signal, some sixty yards off, when he gave the horse the spur, and dashing off at full speed swooped dexterously down to take hold of the bird's head, and if successful, took the prize. It not unfrequently happened that aspiring novices measured their length on the ground, much to the enjoyment of the bystanders. Frequently, however, the rooster was taken out, and even half dollars picked up, with the animal at full speed.

MORE AMUSEMENTS NEEDED.—A Frenchman who lived in Philadelphia, and returned to France, wrote back as follows: “Cheap social pleasures! What a boon they would be to America. You cannot import them; the Germans and others have tried it, and they have only got a bad mixture of low English grog-shops and bad French cafes. They must develop themselves naturally, in accordance with the climate and other general influences which act upon your population. You have shown your capacity in this direction in street railroads, omnibuses, and a few of your watering places and summer resorts. Their cheapness and adaptation to public use are pre-eminent. Do the same thing in your theaters, your ‘hops,’ as you call your dances, and at your picnics, and the like. First of all, however, your churches must take a more cheerful view of life, and cease their war upon human nature. Our French Bible translates Paul’s speech to the Athenians better than the English and German; it makes him say: ‘I find you altogether too devout’ (not ‘superstitious,’ as it is in the other Bibles). I make the same objection to your church people, and I may say of your morality what Pope said of stoicism: “‘Tis fixed as in a frost.”

CULTIVATED WOMEN.—Sheridan said, beautifully: “Women govern us; let us render them perfect; the more they are enlightened, so much the more shall we be. On the cultivation of the mind of women depends the wisdom of men. It is by women that nature writes on the hearts of men.”

VAN VLECK.

**PACIFIC IRON WORKS,
FIRST AND FREMONT STREETS,
Bet. Mission and Howard, - - - SAN FRANCISCO, CAL.**

The Proprietors of the above Works invite the attention of all parties interested to their greatly improved and unequalled facilities for manufacturing Steam Engines and Boilers, both Marine and Stationary, of any required size and pattern, Quartz Mills, Amalgamating, Pumping, and Hoisting Machinery of the most approved construction; Flour, Saw, and Sugar Mills, Water Wheels, etc., etc.

Our Pattern List is most complete and extensive, embracing the late improvements in all classes of Machinery adapted to use on this Coast. We would call especial attention to the fact that we have secured the exclusive right of manufacture for the Pacific Coast of the celebrated Greene Engine, conceded to be the most economical and perfect working Engine now in use. We are also exclusive manufacturers of the celebrated

Bryan Battery, Vurney's Amalgamators and Separators, Ryerson's Superheated Steam Amalgamators, Austin's Stone Breakers, &c. Orders respectfully solicited.

GODDARD & COMPANY.

PACIFIC CONGRESS SPRINGS

Santa Clara County, Cal.

The Fine New HOTEL known as

CONGRESS HALL,

RECENTLY ERECTED AT THE ABOVE

WATERING PLACE,

WILL BE OPEN FOR THE

RECEPTION OF GUESTS

From Early Spring until Fall.

The health-giving properties of the Medicinal Waters, the Bracing Atmosphere, the rugged wildness, and beautiful picturesqueness of its Mountain Scenery unite to make this the most inviting

SUMMER RETREAT

Within hundreds of miles of San Francisco. It may be reached in three and a half hours, as Stages leave Santa Clara for the SPRINGS on the arrival of the Train each day from San Francisco.

Every Attention paid to the Comfort of our Guests.

W. G. GRAHAM & CO.,

Proprietors.

Cataract on the Main North Fork of Feather River, near the Big Meadows.

BOX MEASURES.—A box 16 by $16\frac{1}{2}$ inches square and 8 inches deep will contain a bushel, or 2,150.4 cubic inches—each inch in depth holding one gallon. A box 24 by 11.2 inches square and 8 inches deep will also contain a bushel—each inch in depth holding one gallon. A box 12 by 11.2 inches square and 8 inches deep will contain half a bushel—each inch in depth holding half a gallon.

TO MAKE BLACKBERRY WINE.—There is no wine equal to blackberry wine, when properly made, in flavor or for medical purposes, and all persons who can conveniently do so should manufacture enough for their own use every year, as it is valuable in sickness as a tonic, and nothing is a better remedy for bowel complaint. Measure your berries and bruise them. To every gallon add one quart of water. Let the mixture stand twenty-four hours, stirring occasionally; then strain off the liquor into a cask; to every gallon add two pounds of sugar; cork tight, and let it stand until the following October, and you will have a wine ready for use, without straining or boiling, that will make lips smack that never smacked under such influences before.

S. C. Knott and A. W. Shott fought a duel. The result was, that they changed conditions. Knott was shot and Shott was not. It was better to be Shott than Knott.

N. B.—This Company will remove to its New Building, on Southwest Corner of

California and Sansome Streets,

As soon as same is completed.

W. B. BOURNE, President.

D. J. STAPLES,

Vice-President and Executive Officer.

CHAS. R. BOND,

Secretary.

The Mountain Expressman, in Winter.

Money Orders.

Money Orders can be obtained at the following Post Offices in California: Los Angeles, Marysville, Nevada City, Sacramento City, San Francisco, San Jose, Sonora, and Stockton.

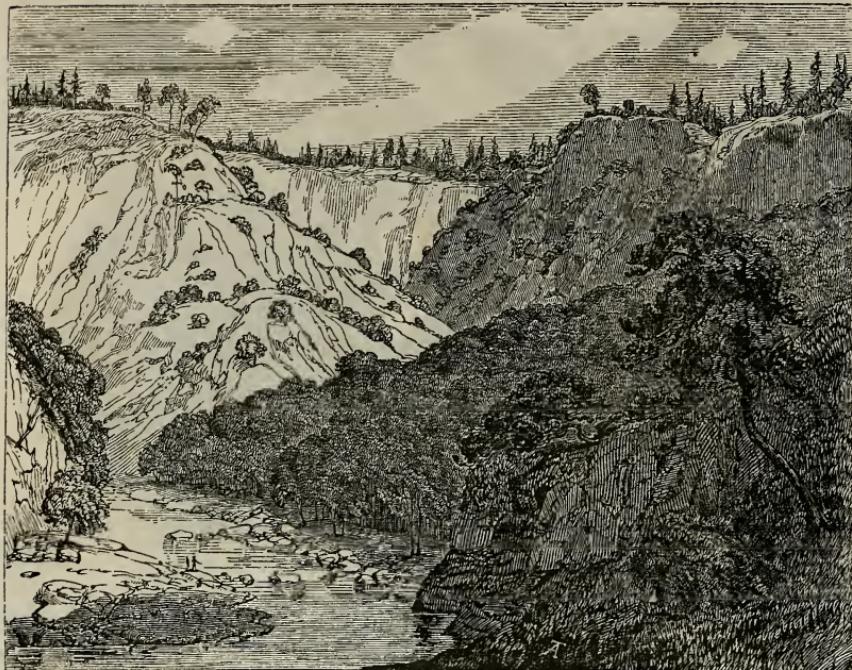

In Nevada: Aurora, Austin, Carson City, and Virginia City.

In Oregon, at Portland.

In Utah, at Salt Lake City.

The rates of commission charged are, for Money Orders not exceeding \$20, 10 cents; Over \$20, not exceeding \$50, 25 cents. No single order issued for more than \$50. Parties desiring to remit larger sums must obtain additional Money Orders. United States Treasury notes or National Bank notes only received or paid.

A WORD FOR OLD MAIDS.—Say what you will of old maids, their love is generally more strong and sincere than that of the young milk-and-water creatures whose hearts vibrate between the joys of wedlock and the dissipations of the ball-room. Until the young heart of woman is capable of settling firmly and exclusively on one object, her love is like a May shower, which makes rainbows, but fills no cisterns.

The Fall River Waterfall--700 feet high--on the Middle Fork of Feather River.

Rates of Postage.

Letters, prepaid by stamps, 3 cents each $\frac{1}{2}$ oz. or fraction thereof, to all parts of the country, including California. If the stamp is omitted by oversight, the letter is sent to the Dead Letter Office. Drop or local letters, 2 cents each $\frac{1}{2}$ oz. prepaid, and all letters and papers delivered in cities free of charge. Circulars, unsealed, 2 cts. for every three circulars to one address.

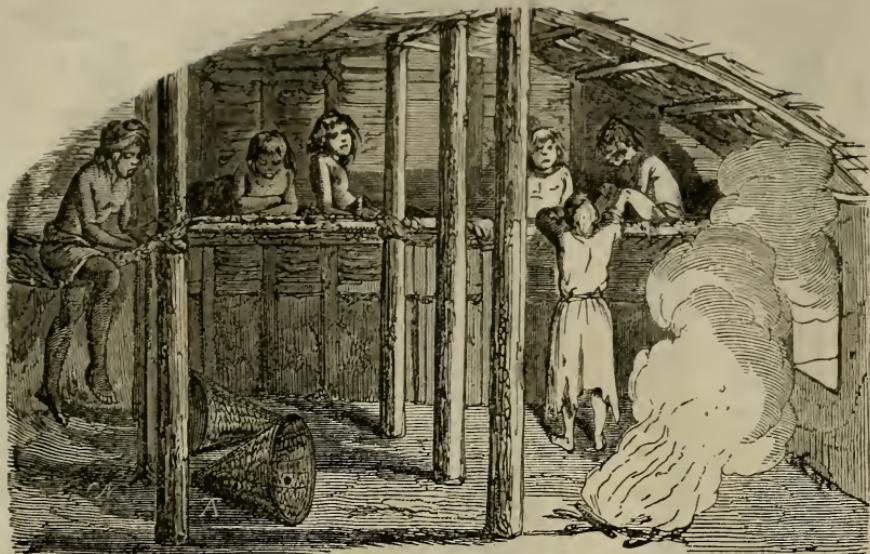

Newspapers to any part of the United States, to regular subscribers, payable quarterly in advance, weekly, not over 4 ozs. 5 cents a quarter, and 5 cents for each additional 4 ozs.; and an additional 5 cents for each additional issue, dailies six times a week being 30 cents a quarter. All other regular periodicals sent to subscribers, 1 cent for less than 4 ozs. Weekly newspapers free in the county where issued. Small periodicals referred to the Postmaster General.

Books, not over 4 ozs., 4 cents; and 4 cents for each additional 4 ozs., or fraction thereof, prepaid.

Other miscellaneous packages, not over 4 ozs., 2 cents, and 2 cents for each additional 4 ozs., p epaid. These unbound miscellaneous packages include single transient papers, proofs, manuscripts for books, cards, samples, cuttings, roots, and all similar articles allowed in the mails.

FOREIGN POSTAGE.—The following are the rates of postage on letters to foreign countries for each half ounce: To England, Ireland, and Scotland, 24 cents. To France and Algeria, by French mails, 15 cents a quarter ounce. By the Bremen or Hamburg mails the postage to Bremen and Hamburg is 10 cents; to Frankfort and Wurtemburg, 15 cents; to the German States, Prussi , Austria, and its States, and Lombardy, 15 cents; to the Sardinian States, 23 cents; to Papal States, 28 cents; to the Two Sicilies, 22 cents; to Denmark, 20 cents; to Sweden, 33 cents; to Norway, 38 cents; to Russia, 29 cents. By the Prussian closed mails, or by French mail, the postage to these countries is higher. The prepayment of letters to them, except to the Two Sicilies, is optional; as also to Canada and the British North American States, where the postage is 10 cts. under 2,000 miles, and 15 cents over. To the following, postage must be prepaid: To British West Indies, Aspinwall, Panama, and Mexico, 10 cents under 2,500 miles, 20 c-nts over; to New Granada, 18 cents; to Peru, 22 c-nts; to Ecuador, Bolivia, and Chili, 24 cents; to Sandwich Islands, New South Wales, and China, by mail to San Francisco, thence by private ship, 10 cents; to China and Australia, via England, 33 and 45 cents, via Marseilles, 39 and 53 cents; to Australia via Panama, 22 cents per half ounce.

The great secret of happiness and contentment, is pleasant occupation. Be sure to remember this.

AN INDIAN SWEAT HOUSE.

This may be termed the "under-ground method" of curing fevers among the California Indians. An excavation is made in the ground, a building is erected therein, which is covered with earth, and made water-tight. A hole at the side forms the door and chimney. A fire is made inside; when the patient enters, and reclines, in a state of nudity, on a shelf, or bunk, until he is in a profuse perspiration, when he immediately goes to the river and plunges into it. This will generally cure him; if it does not, he repeats the experiment. This building is also used for social purposes during winter.

Yo-Semite.

Innumerable lessons to relate
 And myriad voices rushing to baptize
 These chosen lips, which send into the skies
 Their oracles, to awe and elevate.
 The world's chief mouth-piece is this marvelous gate,
 That lavish nature wholly sanctifies
 With majesty and beauty. Here my eyes
 Some revelation seem to penetrate—
 For God, begetting mysteries from the first,
 All glorified, stood down upon the rock,
 And smiting through, the curious earth was riven—
 A thousand silver arteries were burst—
 The mountains staggered from the fearful shock—
 Her heart lay bare to the soft eyes of Heaven.

RAILROAD TRAVELING.—The statistics on this subject prove that this mode of traveling is much safer than the old modes. Thus, in the French post system there were nearly seven times as many deaths as in an equal number of miles by railroad. Yet the number of accidents is inexcusably great, especially in the United States. The summary of several years shows:

In Prussia, killed or wounded, 1 passenger in.....	1,294,075
In Belgium, killed or wounded, 1 passenger in.....	1,611,237
In France, killed or wounded, 1 passenger in.....	375,092
In England, killed or wounded, 1 passenger in.....	311,344
In United States, killed or wounded, 1 passenger in.....	188,459

Thus railroad traveling is more than six times as dangerous here as in Prussia, probably because the responsibility here exacted is less in nearly that proportion.

Antidotes to Poisons.

Remedies where Poisons have been accidentally taken, to be applied as soon as possible, without the delay caused by waiting for a Physician.

For any mineral acid, or acetic acid, or oxalic acid.—Chalk or whiting, washed down with water—magnesia and water—soap and water—followed by milk and white of eggs, with water.

For alkaline poisons.—Vinegar and water, and olive oil.

For arsenic.—1st, Emetics. A simple emetic, in absence of other, is tickling the throat with a feather, and a tea-spoonful of mustard in a glass of water; while voiding the stomach by this means administer milk gruel or barley water in large quantities.

For Corrosive Sublimate.—White of eggs and water, milk, or infusion of nut galls.

Sulphate copper, or any coppery poison.—Sugar and water, or syrup and water, freely; white of eggs and water. N. B. A whole family poisoned with verdigris were saved by the presence of mind of a farm servant, in Sacramento county; he continued to provoke vomiting with

alternate drinks of syrup and water for three hours; when the physician arrived he pronounced them saved.

For opium or laudanum.—Emetics, strong coffee, dashing cold water in face, forced exercise to prevent stupor.

Strichnia, or vegetable alkalies.—Infusion of nut galls.

For antimonial poisons.—Warm milk gruel, barley water, infusion of galls.

For snake, tarantula, or scorpion bites.—At once tie a ligature very tightly above the wound, or pour on a few drops of tincture of cantharides; with the blister which this will raise will come away the sting, if any remain in the wound. In all cases of snake bites the free use of alcoholic drinks—from a wine-glass to a small tumblerfull of brandy or whisky—to be given three times in from fifteen to thirty minutes, and every half hour after till at anyrate a bottle full is taken. In the cases of persons accustomed to drink freely of ardent doses, the drinks must be continued much longer—the comic philosophy of which is that the whisky is the stronger poison of the two, and prevents the other working until its poison is exhausted.
